VELUX flashing
required.

Three great reasons to replace existing skylights when you replace a roof

- 1. Save money** – The most convenient and affordable time to replace a skylight is during re-roofing. Most installers will charge up to double to replace a skylight vs. replacing them while installing a new roof.
- 2. Coinciding warranty** - We are the only skylight company to implement three layers of protection on our design, which allows us to offer an industry first, comprehensive "No Leak" warranty that covers the skylight and its installation against leaks for 10 years. You're getting a new roof with a warranty – why not replace your skylight and enjoy a warranty there as well?
- 3. Improved energy efficiency** - Our "No Leak" skylights offer Clean, Quiet & Safe glass (advanced Low-E3 coating) that provides more daylight and better heat control than any other glass previously offered. The result is year-round comfort and energy savings. You can also save up to \$194* a year on your cooling costs by replacing plastic skylights with energy efficient VELUX glass skylights.

*Based on \$0.15 electric cooling kwh/hr. comparing one VELUX FCM skylight to one plastic dome skylight on a 2,000 sq. ft. home.

Bringing light to life™

Top three reasons to add blinds to your replacement skylight

1. Save money: The easiest, most cost effective way to add blinds to your skylight is the same day your skylight is installed. We now offer factory installed blinds, which makes it easier than ever.

2. Controlling the light: Have total control over the atmosphere of your room.

3. Even better energy efficiency: Make the most energy efficient skylight even better by adding a blind. Adding a blind can increase your energy efficiency by 37%.
