SINCE 1960

Thrush & SON LLC

Complete Home Improvement

Thrush Spouting was founded in 1960 by Wilbur Allen Thrush Sr. Wilbur lived in Phillipsburg, Ohio. With pride strapped to this tool belt, and the attitude that every job will be done with perfection and swiftness and quote, "Every customer will be satisfied!" Wilbur set out on a mission to install spouting and roof homes for everyone. He did just that.

Back in those days Wilbur installed spouting on homes through the week alone, and on the weekend with the help of his brothers and friends. Wilbur had a great reputation for a job well done and the phone began to ring. In 1962 Wilbur hired his first employee. In 1964 Wilbur Allen Thrush Jr. came into the world. At the age of three, Wilbur began to take Allen with him everywhere he went, even to work. He had a lot of patience.

In 1968 the family moved to the Brookville area and the phone number of today, 833-5136, was born. In 1969 the company was renamed Thrush & Son. The first truck with the Thrush & Son logo was a 1969 red Dodge, one ton truck. Later that year, Wilbur purchased our first gutter machine and it was mounted on a Tandem trailer. Gutter was made easy.

In the year 1970 the company color changed from red and black, to yellow and black. Then in 1973 Thrush & Son got its' first step-van. Through out the years, Wilbur had started buying homes and remodeling them. That's where we learned about home improvements from the ground up. The late 70's and early 80's the great recession came into play affecting everybody in the construction and remodeling field. So instead of only doing spouting and roofing, Thrush & Son began insulating homes and installing vinyl siding and windows. In fact everything that needed done on a home we would and could do the job.

In 1985, Corey Allen Thrush came into the world. This begins the third generation. In 1989 Allen purchased Thrush and Son from his Father, Wilbur, who decided he wanted to venture into the well drilling business. In 1990 Thrush & Son opened its' first office and showroom in Brookville, Ohio on Market St., and bought their second step-van. In 1995 Thrush & Son opened a warehouse and showroom at 201 Sycamore St. In 2004, Thrush & Son purchased the Erb Lumber building at 115 Jefferson St. and move into an expanded showroom, offices, and warehouse, where they still currently operate.

STORM DAMAGE

What to know about storm damage?

Storm damage can occur at anytime due to unforeseen circumstances and events. The weather can change at a drastic rate at any time and any moment. Mother nature can produce strong winds, lightning, hail and even tornados. The harsh effects of weather can damage your roof, siding, gutters, patio covers, awnings, and many more features of your home. Storm damage can cause devastating effects on your home if gone unnoticed. If you believe you have any damage, please feel free to give us a call at **888.349.8889** and let one of our professionals give you a free storm damage inspection.

Facts about hail...

According to the National Weather Service, hail results in roughly \$1 billion in damages per year in the United States. If the roof on your home did incur damage by hail, the affected shingles will weather and erode much faster - shortening the life of your roof. Hail damage to asphalt shingles includes severe granule loss, material removal at the edges of the shingles and penetration. A homeowner should have their roof reinspected after the most extreme weather season after the initial storm to see if further damage has incurred such as bruising and granule loss. There is a possibility that if hail damage goes unnoticed your home may experience severe consequences.
